SOME ONE VERY IMPORTANT IS LOOKING FOR ENTREPRENEURS

By Jeff N Marquis and Kerry J Harrison

Yes folks you would be very surprised when we tell you entrepreneurs that some one very important is desperately seeking your expertise and they are willing to pay big bucks for your services, products, and your human resources.

This is not a joke by any means but rather it is a frantic call for all of you entrepreneurs to come forward. Who is calling you to action? None else than Uncle Sam himself. Yes, Uncle Sam is putting out a call for all of you entrepreneurs because he is in dire need of your skills and services.

You see, Uncle Sam is in a very tight spot these days because he is madly scrambling to discover some very crucial resources that he needs badly in order to fulfill the ballooning demands of some very important markets. These markets are extremely influential and their influence is growing daily and will continue to do so for a very long time to come. These markets are made up of consumers who have big bucks to pay for their rapidly increasing demands, they are rapidly growing in size, and they exist worldwide.

Uncle Sam has already started to take action through its legislation which is penalizing companies if they do not meet the demands of these very important markets. Uncle Sam is also spending billions of dollars to ensure that the necessary products and services will be available in a big way. They are stock piling billions of dollars in supplies, and they are bending over backwards to create the products, services, and skills that will be needed to support these infrastructures.

So how do you entrepreneurs figure in all of this? How can you become beneficiaries of these seismic shifts? That's not too difficult for you to do and we are going to get you started. Take a few minutes and read on.

There are several things that you can do from your home or through your own little business in order to increase your incomes. We are going to give you some free tips that are guaranteed to put you ahead of your competition.

First, let us give you a brief description of some of these very important markets that are still very much

untapped. They exist worldwide, and it is estimated by 2010 they will probably make up about 60% of our North American population and they will also probably own about 70% of our banking assets. Just think what the stats will be for the rest of the world. As of 2002 another of these markets consisted of 750 million persons worldwide and of these there were 55 million Americans.

In addition, as of 2002 the 55 million Americans had a combined gross income of about one trillion dollars and they spent about 4.3 billion dollars on some of their most demanded products and services.

These markets that we have just mentioned are our aging baby boomers who are constantly adding to our seniors market and our special needs consumers. Are you beginning to get the picture as yet? Then consider this market: As of 2003 there were about 171 million global consumers of which there were about 18.2 million Americans and the experts are saying that by 2025 this stat would probably reach a global plateau of about 228 million.

Okay, we'll leave you with a few thoughts as to how you can join the move towards increasing your income.

You have to think of the types of products and services that these markets are demanding. Here's a list to get you started. Home care services, health care services, delivery services, home shopping services, home maintenance services, set up services for computers and electronic appliances, and home security services. Of course there is much more that we can add but we are sure that by now you are thinking of your own ideas.

Just think how you can expand your hairdressing services to cater to those customers who are unable to physically visit your salon. Or expand your catering services to deliver meals to those customers who either prefer to stay at home or who are unable to physically go to restaurants.

You can learn more about the dimensions of these very lucrative and untapped markets, how to stay ahead of your competition by discovering these markets before they do, how to become indispensable experts who will be paid big dollars for their expertise, and much more by purchasing a copy of the book "[Untapped Wealth](#)

[Discovered](#)" (the safest and richest untapped markets of the 21st century)" written by us.
